

IF YOU ARE ORDERING A VACBED, this is what we will need from you:

We will need a few measurements to make sure this fits you correctly. You will have to lay down on the floor with your arms at your side and point your toes away from you as far as you can. Then have someone else take these measurements for you to ensure accuracy. Measure any/all people you expect to use the vacbed and provide us with a max/min measurement so we can fit it as best we can to your body type(s). Please be as accurate as possible.

BREATHING OPTION:

- Pointed toes to mouth: ___" / ___ cm
- Mouth to top of head: ___" / ___ cm

NECK GASKET OPTION:

- Pointed toes to collarbone: ___" / ___ cm
- Collarbone to top of head: ___" / ___ cm
- Circumference of your neck: ___" / ___ cm

PENIS GASKET OPTION:

This is an important measurement! Please be as accurate as possible!

- Top of genitals to collarbone: ___" / ___ cm
- Top of genitals to mouth: ___" / ___ cm
- Circumference of the base of your erect penis: ___" / ___ cm

C&B GASKET OPTION:

- Top of genitals to collarbone: ___" / ___ cm
- Top of genitals to mouth: ___" / ___ cm
- Circumference of the base of both your erect penis and testicles: ___" / ___ cm

This is an important measurement! Please be as accurate as possible! To measure for a C&B gasket you should measure yourself when you are erect. To get a feel for where the non-stretch ring will sit, grip around both your penis and testicles - behind the balls and as close to the body as you can. This is the area you want to measure. Wrap your tape measure around to get your circumference. Repeat this process a couple of times to make sure that you get an even more accurate measurement. This gasket is similar to that of a metal cock ring. Googling "how to measure for a metal cock ring" may help.

PORT OPTIONS:

- Where would you like the ports? If your not sure, or you would like to place them where we usually put them ourselves just let us know you have no preference. We usually place them at assumed waist height on the same side as the vacuum :

OTHER REQUIRED INFO:

- Standing height: ___' ___" / ___ cm
 - Anything else we should know? Don't be shy!:
-

****CAUTION** If you 5'9" or taller you should consider a LONG or EXTRA LONG bed as your head or toes may bump up against the frame in a standard-length bed. The Inner dimension of the standard frame is approx. 77" and we try to make sure you clear the bottom bar by a few inches. Please allow for a 1" to 3" discrepancy due to manual measurements. Contact us through your order messages if you want to upgrade the length of your bed.**

You will need to know how to assemble your frame!

You can find instructions for builds, assembly and set up as well as troubleshooting, care, and safety tips here: <https://kinkengineering.com/vacbondage-info/>
